

TAPIUM — NEXT-GEN INSTANT GAME EXPERIENCE

REVOLUTIONARY IMMERSIVE GAMEPLAY

The player constantly interacts with a “living” field, makes decisions on the fly, sees other players' actions, and chooses the timing and level of risk

Bets on space (grid cells) instead of cashout timing

A unique sense of control over the outcome

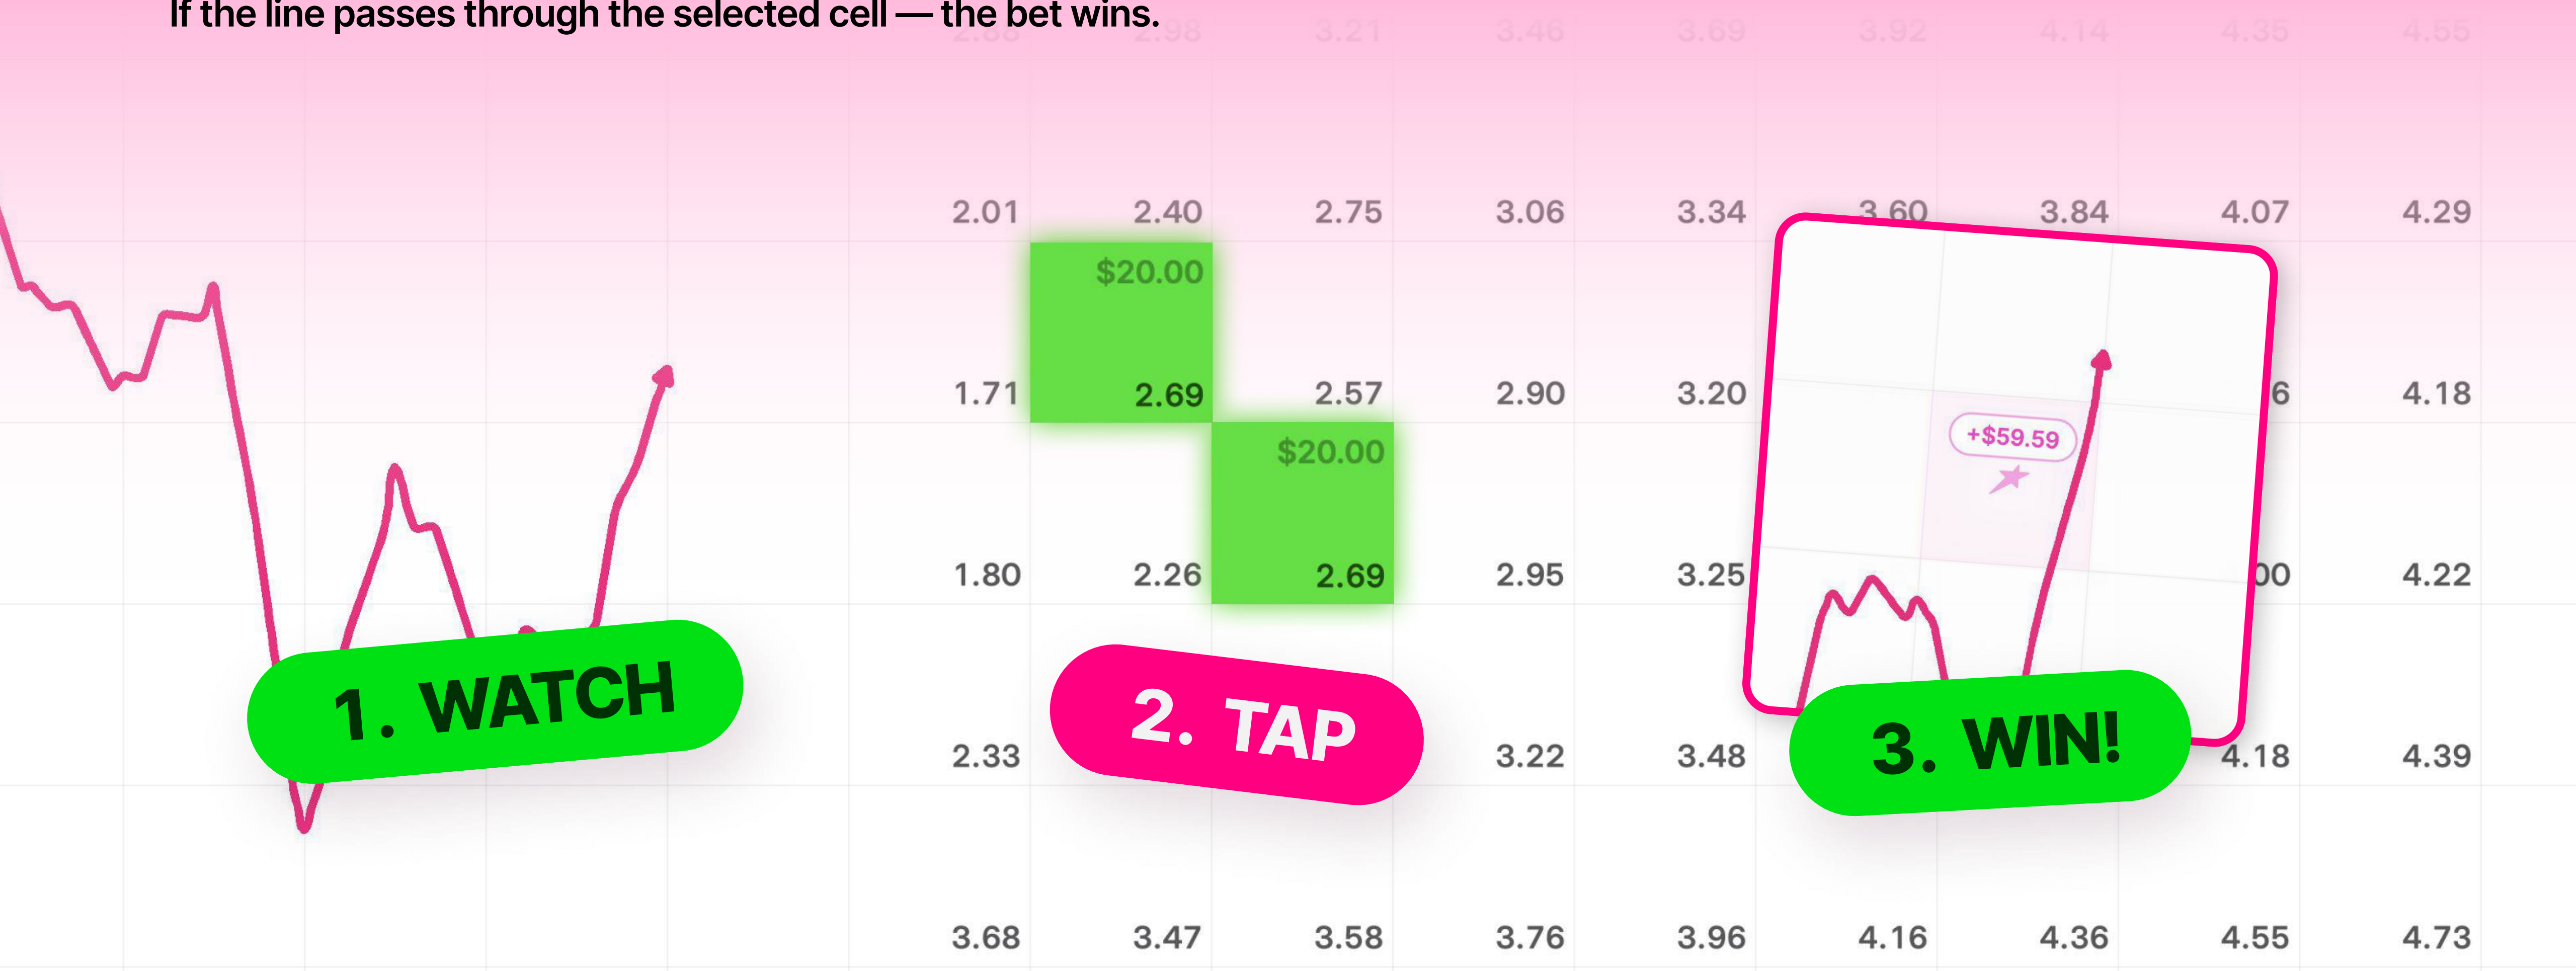

NOT A SLOT, NOT A CRASH LINERUN!

Tapium takes strong player patterns from existing formats, and turns them into a new separate performing game category

WATCH, TAP, WIN

The mechanics are intuitive from the very first second. A single shared line runs across the common field, players tap the cells with dynamic multipliers and lock them in at the moment of placing the bet. If the line passes through the selected cell — the bet wins.

TWO-TIER BONUS SYSTEM

Instant Bonuses

Line hits a bonus cell → win is credited on the fly without interrupting the game

Full Bonus Rounds

Line hits a bonus cell → player enters a bonus field where the line moves across positive and negative multipliers, building a cumulative final bonus multiplier

5000X

200X

1500X

ONE FIELD, MANY PLAYERS

A social layer that turns betting into a spectacle and triggers the crowd effect

The field highlights the density of all players' bets in real time on a single shared field. The player is not guessing blindly — they see how others behave and react
